Company Upgrades Alliance ERP System to Version 7.0

Durham, Connecticut - January 2006 - Technical Manufacturing Corporation announced this month that it will upgrade its Alliance Enterprise Resource Planning (ERP) system from version 6.5 to the latest version 7.0. Upgrading to version 7.0 is expected to provide unparalleled customer service benefits that will continue to differentiate and support Technical Manufacturing Corporation as a local industry leader in the contract electronics manufacturing arena. With well over a dozen enhancements, version 7.0 now includes multi-currency support for users that buy and sell in foreign currencies, enhanced sidebar options, and links to documents on sales and purchase orders. The enhancements in version 7.0 are aimed at creating greater efficiencies in daily tasks, which result in increased productivity for Alliance users and includes new view screens and grids, a work order release manager, and links to material requirements planning that review the cause and effect of demand within the manufacturing organization.

The Alliance system is a full-featured ERP solution based on the APICS MRP-II model. It's intelligent mixed-mode manufacturing capability offers unparalleled flexibility with support for a variety of manufacturing modes and combinations, including make-to-stock, make-to-order, and assemble-to-order. The Alliance system is produced by Exact Software(tm) which is a leading provider of solutions that connect the people, processes and knowledge essential to an organization. For more information on the Alliance ERP system please visit www.alliancemfg.com for a complete overview regarding this Enterprise Resource Planning system.
