

FOR IMMEDIATE RELEASE

Company Earns Perfect Supplier Evaluation Score and Preferred Supplier Status from Customer

Durham, Connecticut – March 2009 – Technical Manufacturing Corporation announced this month that it has received a perfect supplier evaluation score from a major OEM customer that designs and manufactures minimally invasive surgical equipment for the medical industry. The supplier evaluation score is determined from a weighted formula which includes Quality, Price, Delivery and Customer Service parameters. The perfect supplier evaluation score earns Technical Manufacturing Corporation preferred supplier status, which is valid for the calendar year. The company has been servicing the contract electronics manufacturing requirements for this customer for several years which primarily includes complex high-reliability multi-layer rigid and flexible printed circuit board assemblies consisting of ball grid arrays, 0402 and 0201 component package sizes.

“Everyone in the company deserves to take credit for this accomplishment, but in particular I’d like to single out the members of our internal Quality Improvement Team, who are directly responsible for ensuring overall customer satisfaction through proactive lean events, process reengineering and continuous improvement at all levels of the company” said Mr. David Bonito, Sales and Marketing Manager. Mr. Bonito also points to several systems in the company including the proprietary Product Inspection Tracking System that are used to measure Quality (internal and external) and Delivery performance to monitor overall customer satisfaction. Results of the Product Inspection Tracking System are posted on the company’s website as a six month rolling window and are available to the public.

About Technical Manufacturing Corporation

Technical Manufacturing Corporation is a Connecticut-based contract electronics manufacturing company that has been successfully providing electronics manufacturing services to small and Fortune 500 companies worldwide since 1985.
