

FOR IMMEDIATE RELEASE

Company Achieves ISO 9001:2008 and AS 9100C Certification

Durham, Connecticut – May 2012 – Technical Manufacturing Corporation announced this month that the company's quality management system has been certified and registered to the ISO 9001:2008 and AS 9100C international standards through its auditor SAI Global. Certification of the quality management system to the current revision C of the more stringent AS 9100 international standard represents one of the first registrations issued to a contract electronics manufacturer in the New England area. It now allows the company to better support its current customers in the aerospace and defense industries and to pursue new opportunities with companies who require contract electronics manufacturing services at the elevated levels of quality and performance that the standard requires.

"Certification of our quality management system to the AS 9100C standard has been a long-term goal of the company for the last several years and is the culmination of dedicated and focused efforts of every employee working together as a team. To finally realize this tremendous achievement is a special milestone for the company" said Mr. David Bonito, Vice President. According to Mr. Bonito, "All of our customers, regardless of industry affiliation, will participate in the many benefits that an AS 9100C certified quality management system provides." Mr. Anthony Calabrese, Director of Operations, agrees and further elaborates on these benefits. "One of the main benefits includes cost savings which can be realized through continuous improvement initiatives geared towards increasing the effectiveness of our processes. These cost savings can then be directly passed on to our customers" he said.

An electronic copy of the ISO 9001:2008 and AS 9100C registration certificate is available on the company's website at www.techmfgcorp.com for customer review. The company has also been included in the Online Aerospace Supplier Information System (OASIS) database which includes additional information on the registration certificate and assessment results for industry use. Please contact Mr. David Bonito as the administrator of the account by email at dbonito@techmfgcorp.com for permission to access assessment results.

About Technical Manufacturing Corporation

Technical Manufacturing Corporation is a Connecticut-based contract electronics manufacturing company that has been successfully providing electronics manufacturing services to companies worldwide since 1985. We build a wide variety of electronic and electromechanical products for our customers, which are used in many different commercial and military applications across all industries including the medical, computer, automotive, aerospace, test & measurement and telecommunications industries.
