

FOR IMMEDIATE RELEASE

Company Qualified by Lockheed Martin Missiles & Fire  
Control as Approved Supplier for CLASS 3 Circuit Card Assemblies

Durham, Connecticut – March 2015 – Technical Manufacturing Corporation, a leading supplier of contract electronics manufacturing services to the aerospace and defense industry for mission-critical, high-reliability and harsh environment applications where reliability and continued performance is critical, announced this month that it has successfully passed an intensive audit of its Quality Management System by Lockheed Martin Missile and Fire Control in Orlando, Florida. The audit was performed by Supplier Quality Field Engineers over several days to ensure company compliance with the IPC J-STD-001 CLASS 3 (“Requirements for Soldered Electrical and Electronic Assemblies”) and the ANSI S20.20 (“Electrostatic Discharge Control Program for the Protection of Electrical and Electronic Parts, Assemblies and Equipment”) industry specifications, both of which govern the production of printed circuit board and circuit card assemblies throughout the electronics manufacturing industry. The company has been added to their Approved Supplier List and can now be used directly by Lockheed Martin as well as any of its suppliers for the procurement of rigid, flex and rigid-flex circuit card assemblies for use in high reliability CLASS 3 aerospace and defense applications.

About Technical Manufacturing Corporation

Technical Manufacturing Corporation is a Connecticut-based contract electronics manufacturing company that has been successfully providing electronics manufacturing services to companies worldwide since 1985. We build a wide variety of electronic and electromechanical products for our customers, which are used in many different commercial and military applications across all industries including the medical, computer, automotive, aerospace, test & measurement and telecommunications industries.
