

FOR IMMEDIATE RELEASE

Company Joins Government Industry Data Exchange Program (GIDEP)
to Help Support Counterfeit Part Risk Mitigation Efforts

Durham, Connecticut – April 2016 – Technical Manufacturing Corporation, a leading supplier of contract electronics manufacturing services to the aerospace and defense industry for mission-critical, high-reliability and harsh environment applications where reliability and continued performance is critical, announced this month that it has joined the Government-Industry Data Exchange Program (GIDEP) to help support the company's purchasing and procurement efforts in eliminating and mitigating exposure to counterfeit or otherwise nonconforming electronics parts and components throughout the supply chain. Participation in the Government-Industry Data Exchange Program is voluntary but an important risk prevention step for every company involved in manufacturing for the aerospace and defense industry. Put in place by the government as a response to a growing global concern costing billions of dollars annually, the main purpose of the GIDEP program is to identify suspect or confirmed counterfeit parts and share that information with the Department of Defense (DoD) and other participating companies to actively prevent counterfeit part and components from compromising product safety and integrity.

About Technical Manufacturing Corporation

Technical Manufacturing Corporation is a Connecticut-based contract electronics manufacturing company that has been successfully providing high quality electronics manufacturing services to companies worldwide since 1985. We specialize in building high reliability printed circuit board and circuit card assemblies for our customers, which are used in many different commercial and military applications across all industries including the medical, computer, automotive, aerospace, test & measurement and telecommunications industries.
