

FOR IMMEDIATE RELEASE

**Company Develops Cybersecurity Maturity Model Certification (CMMC)  
Model 2.0 Level 2 (Advanced) System Security Plan**

Durham, Connecticut – November 2021 – Technical Manufacturing Corporation, a leading supplier of contract electronics manufacturing services to the aerospace and defense industry for mission-critical, high-reliability and harsh environment applications where reliability and continued performance is critical, announced this month that it has completed the development of a System Security Plan that is required to be in place in accordance with the Department of Defense whenever DFARS clause 252.204-7012 is invoked in a contract that meets all Cybersecurity Maturity Model Certification (CMMC) Model 2.0 Level 2 (Advanced) requirements for advanced cyber hygiene.

The development of a Level 2 System Security Plan helps to provide for the advanced protection of Controlled Unclassified Information (CUI) that might be included in a technical data package for circuit card assemblies used in sensitive aerospace and defense applications. The System Security Plan is expected to be independently audited for a three year registration certificate by a Certified Third Party Assessor Organization (C3PAO) as soon as the CMMC Accreditation Body (CMMC-AB) has completed infrastructure development and is ready to perform system audits.

**About Technical Manufacturing Corporation**

Technical Manufacturing Corporation is a Connecticut-based contract electronics manufacturing company that has been successfully providing electronics manufacturing services to companies worldwide since 1985. We build a wide variety of electronic and electromechanical products for our customers, which are used in many different commercial and military applications across all industries including the medical, computer, automotive, aerospace, test & measurement and telecommunications industries.
