

FOR IMMEDIATE RELEASE

Gold Merit Status Awarded to the Company against Nadcap AC7120
Accreditation in Electronics for Printed Board Assemblies

Durham, Connecticut – March 2022 – Technical Manufacturing Corporation, a leading supplier of contract electronics manufacturing services to the aerospace and defense industry for mission-critical, high-reliability and harsh environment applications where reliability and continued performance is critical, announced this month that it has been awarded gold merit status for the National Aerospace and Defense Contractors Accreditation Program against the AC7120 audit criteria for printed board assemblies. The Nadcap program is managed by the Performance Review Institute (PRI) on behalf of all subscribing prime defense contractors through the Electronics Task Group as a special process to ensure that all accredited suppliers conform to a uniform set of over 450 rigorous manufacturing requirements necessary to produce circuit card assemblies for the aerospace and defense industry. PRI maintains the online Qualified Manufacturers List (QML) which identifies all Nadcap suppliers based on their commodity or special process accreditation.

The Nadcap merit program exists to reward companies who exhibit superior performance during their audits by extending their reaccreditation audit cycle frequency from twelve months to up to eighteen (silver merit) and then twenty-four months (gold merit), generating a significant cost savings. Companies who achieve merit status means that they typically receive three times fewer major non-conformances and approximately two times fewer total non-conformances in their Nadcap audits. According to the PRI website, “the Nadcap audit is a stringent process designed to highlight members of the aerospace supply chain with outstanding quality and engineering processes. Entry into the merit program represents an industry-wide recognition for those suppliers who really are the crème de la crème in the industry”.

About Technical Manufacturing Corporation

Technical Manufacturing Corporation is a Connecticut-based contract electronics manufacturing company that has been successfully providing electronics manufacturing services to companies worldwide since 1985. We build a wide variety of electronic and electromechanical products for our customers, which are used in many different commercial and military applications across all industries including the medical, computer, automotive, aerospace, test & measurement and telecommunications industries.
